

# Start Here!

**0**

These settings were pre-configured as requested by your company:

IP address:	XXX.XXX.XXX.XXX	Administrative Username:
Netmask:	XXX.XXX.XXX.XXX	admin@domain.com
Gateway:	XXX.XXX.XXX.XXX	Initial Password: xxxxxxxx

**1**

Plug a network cable into Eth0. Facing the rear panel, it is the left of two network ports.

Note: The network cable should connect the Anti-Spam Appliance to the same LAN that includes your existing mail server.

**2**

Plug in power cord. Turn on the power switch. Wait 3 minutes.

**3**

From another PC attached to the network, visit [vq.domain.com](https://vq.domain.com)

In the event that you have not yet configured your DNS server for this domain, you may alternatively attach a network wire to Eth1 and visit <https://192.168.1.22>

**4**

Login, using the admin user ID and password from the cover page of your binder, and complete the setup procedure.

See the Anti-Spam Appliance Administrator's Guide for assistance
